

CERTIFICATE OF CONFORMITY

Energy management System

herewith we certify to the enterprise

STRACK NORMA GmbH & Co. KG

the proof about the realization of an energy audit according to the legal regulations of §§ 8 ff. EDL-G (the layabout energy services and other energy efficiency measures)

according to

DIN EN 16247-1

According to German Institute for Standardization EN 16247-1 an energy audit is a systematic inspection and analysis of the energy application and the energy consumption of an arrangement, of a building, a system or an organization with the aim to identify energy flows and the potential for energy efficiency improvements and report about this.
